Experience

Python Backend & AI Developer

Jun 2025

Self Projects

- Developed scalable backend systems using FastAPI and Pydantic.
- Designed and integrated PostgreSQL databases with backend applications.
- Implemented secure JWT authentication and RESTful APIs.
- Built machine learning models using Scikit-learn.
- Visualized data insights using Matplotlib and Seaborn.
- Created interactive web applications using Streamlit.
- Containerized applications using Docker for deployment.
- Deployed backend services on AWS cloud.
- Tested APIs using Postman and managed version control with Git.

Technical Skills

Languages: Python, SQL, HTML/CSS, JavaScript, C++, Java, Bash

Technologies/Frameworks/Libraries: FastAPI, Pydantic, PostgreSQL, Scikit-learn, NumPy, Spacy, Matplotlib, NLTK, Streamlit, Docker

Tools & Platforms: Git, GitHub, Postman, Docker, AWS, VS Code

Core Concepts: Data Structures, Algorithms

Projects

Insurance Premium Prediction | *Python, Machine Learning, Fast-API, Pandas, Sk-learn, Streamlit* | [GitHub](#) | [LiveLink](#)

- Developed a **machine learning model** to predict insurance premiums based on factors like age, BMI, smoking habits, and region.
- Performed **data preprocessing**, **feature encoding**, and **model training** using Scikit-learn algorithms.
- Built a **user-friendly Streamlit interface** where users can input details and get predicted insurance costs instantly.

InternMatch | *HTML, CSS, JS, Python, Machine Learning, Flask, MySQL, Scikit-learn* | [GitHub](#)

- Developed an **AI-powered internship recommendation system** that suggests internships based on student skills, branch, and interests.
- Implemented **machine learning models using Scikit-learn**, to predict suitable internship roles.
- Built an interactive **Streamlit web application** for real-time internship recommendations.

Mental Health Analyzer | *Python, Machine Learning, Transformers, Pandas, NLTK, Streamlit* | [GitHub](#) | [LiveLink](#)

- **Developed** an **NLP-based** system to analyze mental health sentiment from user text input.
- Applied **text preprocessing**, **TF-IDF vectorization**, and **machine learning** classification models for sentiment detection.
- Built a **web interface using Streamlit** to provide real-time mental health feedback and insights.

Education

Bachelor of Technology (B.Tech) in Computer Science and Engineering

2023 – 2027

Modern Institute of Technology and Management, Bhubaneswar

Expected Graduation

Class XII - CHSE

2021 – 2023

Gandhi Science College, Khordha

Class X - CHSE

2020 – 2021

Achyutananda Govt. High School, Injidi

Achievements

- **Selected** as an **Internshala Student Partner (ISP)** after clearing the competitive selection process to promote internships and career opportunities among students.
- Secured **1st Position** in College-level PPT Presentation Competition, demonstrating strong **research**, **presentation**, and **public speaking skills**.
- Actively participated in **technical events, workshops, and competitions** to enhance **problem-solving**, **collaboration**, and **leadership abilities**.
